Creating a ggplot

```
library(ggplot2)
data(mpg)
df <- mpg
ggplot(data = df, mapping = aes(x = displ ,y =hwy)) +geom_point()
```

Aesthetic mapping

```
library(ggplot2)
ggplot(data = df, mapping = aes(x = displ ,y =hwy, colour = class)) +geom_point()
```

```
library(ggplot2)
ggplot(data = df, mapping = aes(x = displ ,y =hwy, shape = class)) +geom_point()
```

```
## Warning: The shape palette can deal with a maximum of 6 discrete values because more
## than 6 becomes difficult to discriminate
## i you have requested 7 values. Consider specifying shapes manually if you need
## that many have them.
```

```
## Warning: Removed 62 rows containing missing values or values outside the scale range
## ('geom_point()').
```

```
library(ggplot2)
ggplot(data = df, mapping = aes(x = displ ,y =hwy, colour = class)) +geom_point() +facet_wrap(~class
```
